A
Shift in the model score, every pair
Outlined: stands out from the null (BH q < 0.05); number shown
Substitution being scored

0.0
−0.2
−0.4
−0.6
Substitution already on the sequence
B
The 72 pairs against 92,682 null draws
Null: the same nine substitutions on backgrounds at other sites
Null draws per bin (log scale)
S144N then I160K
+0.61
K189R then Q173R
+0.54
N158D then Q173R
-0.73
Null median
Clade pair, q < 0.05
Clade pair, not distinct
Shift in model score (zero-sum scale)
C
Each substitution against its own null
Bands: 50, 90 and 98% of its null draws; line: null median; dots: its pairs in the clade
Shift in model score (zero-sum scale)
